Only in American Standard English can one find this phraseologically connected meaning for the word dirt. In the same word, the phraseologically related meaning "practical, farming his own land" is realized in conjunction with the noun farmer: I, being the female, took off the mantle of a teacher and put on the blue jeans of a dirt farmer (Saturday Evening Post) . The word truck has the phraseologically related meaning "fresh vegetables grown for sale" in a series of consistent contexts truck garden, truck farm, and truck crop: South Jersey, in contrast, is flat truck crop far. The idioms on one's side of the fence and on the other side of the fence serve as diagnostic contexts in which this meaning is realized: So here we are, on opposite sides of the fence.

In England, the word "dirt" only appears in this sense in territorial dialects, claims M. Matthews (Dictionary of Americanisms). The number of powerful men on my side of the aisle is equal to that of Tilney's (Dreiser). When identifying distributional differences between divergents, the syntactic context occasionally (though much less frequently) acts as a diagnostic context. The word "rate" is one such instance. Its common English definitions include "to estimate; calculate, count, and tax," among other things. ") is used as a transitive one, while its American lexico-semantic equivalent ("to be at the height of the situation, highly quoted") is used in constructions without an addition: Unless you could dance well, you just didn't rate. What misdeed did he ever commit that makes him noteworthy?. The syntactic context (compatibility with prepositional-nominal phrases) of the sentence, I'll visit with mother tomorrow

(Webster's New World Dictionary), indicates that the verb "visit" is being used in the typical AE sense of "to go on a visit; to make a social call.". The American lexical-semantic variant of the verb to trade frequently appears with a prepositional-nominal phrase: I can attest to having experienced a brief moment of surprise when hearing an American friend say that he trades at some store or another. The mastering England in the early medieval era in the age of globalization. And .As the official language, English is now something that must be learned each and every one. This is the primary tool most frequently used in nearly 60 countries to foster communication and boost international competition. The world is divided into four aspects. English is the language used to teach language skills in English, specifically, reading, writing, listening, and speaking as a first communication medium. The four skills have a high demand among other people around the world in the international language that is used to communicate with them. Because these four skills are a part of it, English is a contribution and can be used as evidence that the Germanic language family was first spoken in that country. Communication, which is essentially the function of language. despite the fact that writing is a crucial skill. Writing abilities need to be regularly trained in and practiced.
