

HOW TO IMPROVE YOUR ENGLISH LANGUAGE SKILLS?

Zokirova Shohsanam Zohidjon qizi

Student , Uzbekistan State World Languages University First year student of the 2nd Foreign Language and Literature Faculty

Abstract: English is the most widely spoken language today and the time demands to learn it. As with all language learning problems, English has its own problems. This article provides clear evidence and recommendations for four skills that are important in learning English. Speaking in this article, a new language learner who has problems in reading, writing, and listening skills can find a solution to all of the above problems by reading, and it will make learning English much easier.

Key words: Language, problems, recommendations, skills, evidence, information, solutions, English, language learners, common.

The main part:

Learning English as a second language can be complex and challenging. Additionally, English is a widely spoken language that transcends borders and is used in many countries worldwide. Despite this, there are still individuals who struggle with learning or enhancing their English skills. Learning a foreign language is typically difficult for everyone. To effectively communicate in a specific language, four fundamental skills must be honed: listening, speaking, reading, and writing. If you're seeking ways to improve your English proficiency, consider these helpful tips to expedite the development of all four language abilities.

When it comes to reading, start with simple texts and gradually progress to more complex materials. Explore various genres such as novels, newspapers, magazines, and online articles. Look up unfamiliar words and expand your vocabulary. Reading extensively has numerous benefits for personal growth and self-esteem.

Writing practice is essential for improving your English skills. Write regularly by keeping a journal or composing essays and short stories. Seek feedback from teachers or native speakers to identify areas for improvement. Pay attention to grammar, vocabulary, and sentence structure while writing. Consistent writing will not only help you overcome the fear of a blank page but also develop your unique writing style.

For listening skills, expose yourself to English audio materials like podcasts, interviews, and news broadcasts. Initially use subtitles while watching movies or TV shows in English, but gradually decrease reliance on

them. Regularly engage in listening comprehension exercises to enhance your understanding of spoken English.

To improve speaking abilities, find opportunities to converse with native speakers or language exchange partners. Join conversation clubs or language learning groups where you can practice speaking in a supportive environment. Talk aloud in English even when alone and try thinking in English to improve response timeduring conversations. Utilize language exchange apps like HelloTalk or Tandem to connect with native speakers online.

Lastly, record yourself speaking and listen back multiple times to identify errors related to pronunciation or fluency.

Overall, by focusing on these four skills - reading, writing, listening, and speaking you can expedite your development of English proficiency as a second language learner.

Conclusion:

In learning every subject, we are faced with a difficult problem, but it does not mean that it is impossible, we can definitely do it if we try hard. Remember that improving language skills takes time and consistent effort. Be patentwith yourself and celebrate small achivements along the way.

Overall tips: Set specific goals for each skill and track your progress regularly, use online resources such as language learning apps, websites or online courses to supplement your learning. Immerse yourself with English-speaking environments through music, movies and social media.

At the end of my article, I would like to say that there is nothing difficult, it just seems so, because we do not have the will to do it. there are also the words of our Prophet: "Deeds are based to intentions, and everyone will get what was intended".
