Annotation: *In our modern life education comes first, because it is the need of the hour. Furthermore, every people should have a diploma. In addition to, education system special for each country. I can say without any hesitation that, education is the foundation of the country. This paper explores education system and quality of education in different countries.*

Passages include new information about education, students and pupils feedbacks about conditions in their schools and universities, quality of education. By analyzing these trends, you will understand better education system in another countries.

Key words: *diploma, education system, quality of education, new information about education.*

Education system is very delicate and important thing in every country. This system ought to be comfortable for pupils and students. Moreover universities' and schools' systems are different, so before enter to the university pupils prepared at school. As I have mentioned above, education is the foundation of the country, because people can not control the country without erudite. Digital technologies are increase, so education system is changing fast.

What is a diploma? Why it is essential for us?

Diploma is key to your future profession and career. As you know, without diploma you can not apply to job with high salary. In addition to, diplomas are documents awarded by a higher education establishment to showcase one's mastery in a particular study. However, after graduate with diploma you must have good practical skills. After that you can apply to international companies or another companies with high salary.

Differences between education system.

Education systems also differ in their priority on professional and academic education. Some countries grade professional training, equipping students with practical skills for specific careers, while others lean toward academic rigor, preparing students for university education and intellectual tracking. For example, exchange experiences program help for learn interesting thing from foreign students. Then you will improve your language.

Quality of education.

Quality is important in any sphere. This quality is able to unlock the imagination and fundamental for self-development. I would to mention that, quality will affect to your study, the reason for materials for your study will be in good condition. Then, this quality is different in every country, because education system is different. The state determines standard of teaching.

New technologies in teaching system.

New technologies give a lot of new information in education sphere. We learn and study from this technologies, because any information is available in this technologies. Furthermore, we are not able to change this, the reason for we live in modern and digital life. In addition to, digital technologies make our study easier and effectively.

Evaluation criteria.

Of course, education system include evaluation criteria. Evaluation criteria consists of 2,3,4 and 5. The high mark as you now is 5. If you want to achieve to the maximum score, you have to study hard. This criteria help to count total score. Moreover, in America another evaluation criteria. For instance: Focus, development, organization, style and conventions.

Subjects and teachers.

There are several subjects teaching in university and school, but some people dislike any subjects, because they are boring for them. In my opinion, every subjects increase

our erudite. Teachers guide people to the right way. They communicate with pupils as a friend. Teachers teach us without stopping.

Free education and paid education.

In some countries you should pay for study. It is a little bit difficult for some people, because it is expensive. With technology advances making education more accessible than ever before, it can be difficult to decide between free and paid educational opportunities. On one hand, free education is a great way to gain knowledge about any subject, often from qualified and experienced professionals. However, when it comes to support and depth of learning, paid education may be the best way to go. The tuition cost typically covers not only access to a higher quality of teaching materials and valuable critiques, but also provides a greater sense of structure which can be beneficial for students looking for focus.
